

ARSH VASANI

FRONT-END DEVELOPER

Ahmedabad 380059 • +919409273874 • arshvasani9@gmail.com • WWW: <https://arsh-vasani-resume.vercel.app/>

PROFESSIONAL SUMMARY

Front End Developer building responsive web interfaces with **React**, **Next.js**, and **HTML/CSS**. Develops reusable components, integrates front-end code with server-side logic, and strengthens usability through testing, debugging, and cross-browser support. Collaborates with designers and reviews code to keep layouts clean, consistent, and aligned with modern web standards.

SKILLS

Technical Skills: React, Next.js, HTML/CSS, JavaScript libraries, MongoDB, TypeScript

Frontend Engineering: Cross-browser testing, Component architecture, State management, Accessibility testing, Performance optimization

Design Collaboration: Design systems, Component libraries, Visual hierarchy, Figma, Design handoff

Backend Development: Node.js

Full Stack Development: API integration

Security: Authentication and authorization

Application Reliability: Error handling

Web Application Architecture: Server-side rendering

PROJECTS

GetNextJS Templates — 2026

Next.js • React • MongoDB • Authentication • Payments

- Built the initial version of this Next.js template marketplace — producing the majority of templates sold on the site, shaping its visual design, and cataloguing products into the database.
- Wired up user authentication and a payment gateway for digital downloads.

Live Demo: <https://getnextjstemplates.com/>

TailwindAdmin — 2025–2026

React • Next.js • Tailwind CSS • TypeScript

- Participated in the core creation of this open-source React admin dashboard template — building the dashboard layouts and crafting reusable components and Tailwind UI blocks.
- Shaped the landing experience across its React and Next.js versions.

Live Demo: <https://tailwind-admin.com/>

Shadcn Space — 2025–2026

React • Next.js • shadcn/ui • Tailwind CSS • Base UI

- Participated in the core creation of this shadcn/ui block library — helping build the platform and maintaining code quality across the collection.
